

Professional
Heat Gun

Marking the future with you

QL2™ Professional Heat Gun

Performing with safety and industrial strength in mind

The QL2 Pro Heat Gun doubles your performance with two interchangeable lightweight heads. The 319,000 BTU head optimizes the visual performance of OPTAMARK™ preformed thermoplastic. Production efficiency increases with the 553,000 BTU head.

The QL2's industrial structure is designed to optimize the application and performance of preformed thermoplastic materials, heat activated adhesives and Chipfill™.

Features and benefits

- Two separate interchangeable heads allow for versatility during application
- Ergonomic light weight 2 lb design ensures worker comfort and minimizes user fatigue
- Power easily controlled through light pressure on the trigger
- Reduced noise level (81 dBa) helps to improve worker communication
- Quick click system, no tools needed
- Two heads, hose and regulator all in one durable travel case

The 319,000 BTU head

Safety

- Releasing the safety handle shuts the heat gun off.
- Automatic POL safety valve cuts off fuel supply in case of hose breakage.
- Professional quality rubber hose meets ISO 3821 standard.
- Meets safety standards under the UL Listing.

Quick Start

- Ready to use in less than a minute.
- Easy single-click hose connection with the quick connector.
- Piezo ignition ensures the flame starts with a single press of the trigger, improving safety and efficiency.
- Quick click system. No extra tools necessary.
