

# TacPad™ & TacGuide™

Help guide the visually impaired in the right direction

## TacPad and TacGuide Granite MX

The domed TacPad™ tile makes it possible to alert visually impaired pedestrians to a safe place to cross the road or a change of direction by creating a texture contrast to the surface of the pavement. The relief patterns are detectable by foot or with a cane.

TacGuide™ is a tactile marking that guides people with visual impairment. The ribbed TacGuide, informs you of and guides you through hazardous areas in the traffic, and in places such as train stations and airports.

Marking the future with you

- TacPad™ and TacGuide™ Granite is a MMA tactile markings with anti-skid properties. With an SRT >76, is ideal for pedestrian traffic areas where extra slip-resistance is required.
- TacPad and TacGuide Granite are dirt-resistant with high colour retention which makes the application looks neat and newly applied over time.
- When a fast, easy and hassle-free application is required, the unique MX application system that doesn't require any glue or separate adhesive layer to be applied.

Brand	Product	Design	Beige 1015	Grey 7040	Black	Yellow 1023	Tomato Red	Dimensions (mm)
TacPad™	Granite MX 15	B1						400 x 400
		B2a						
TacGuide™	Granite MX 15	R1 (8 Ribs)						400 x 400
		R3 (4 Ribs)						

## MX15 adhesive application system

MX is a high-performance adhesive on the reverse of the material. It is protected by a parchment paper that is simply removed before application after which the product is manually pressed down onto the surface.

- No requirement for additional adhesives or heat for application.
- Apply to existing surfaces (retro-fit), internally and externally, without costly civils works.
- Can be applied onto fresh macadam.
- No reinstatement or preparation of sub-surface.
- Easier to replace if damaged.
- Quicker to install than concrete and tactiles applied with adhesives, and requires little labour.
- Recyclable packaging and no adhesive tubs for disposal.
- No mess and no requirement for taping the area.
- Less pedestrian and traffic management required and can be opened to pedestrians as soon as applied.

Tactile type	Approx. application time for 20 tiles
Concrete	2 days
Preformed tactile with adhesive	3 hours
TacPad/TacGuide Granite MX15	20 minutes
